DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11 and 13-15, drawn to polyurethanes of formula (I) and compositions thereof, classified in class 514, subclass 788.
 - II. Claim 12, drawn to method of using a polyurethane as a thickener, classified in class 514, subclass 788.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process of using the polyurethanes of formula (I) as thickeners can be practiced with a variety of polyurethanes, for example those disclosed by Emmons et al (US Pat. 4,079,028) which teaches the use of polyurethane thickeners in aqueous systems.
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper. The additional search for the subject matter of Group II constitutes a serious burden for the examiner.

Art Unit: 1617

4. Groups I and II are generic to a plurality of disclosed patentably distinct species comprising polyurethanes of formula (I). The vast number of species encompassed by the claims constitutes a serious burden on the Examiner. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species and the claims readable thereon, even though this requirement is traversed. By single species is meant a single polymer. The polymer can be identified by the following: 1) by naming the polymer according to IUPAC standards, 2) by pictorial representation, 3) by identifying all of the variables of formula (I), or 4) by identifying an example or claim that sets forth a single polymer.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
